

Charting our Future with HELM 3

HELM

HELM 3

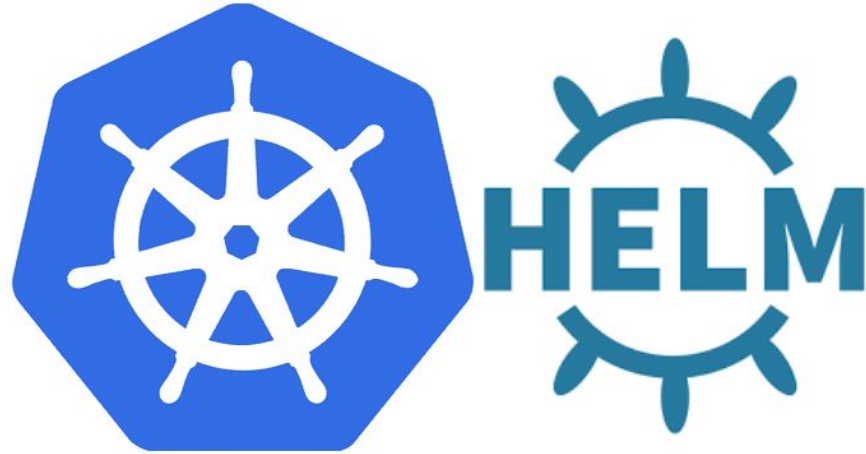

Demo

WHY HELM?

Kubernetes + HELM

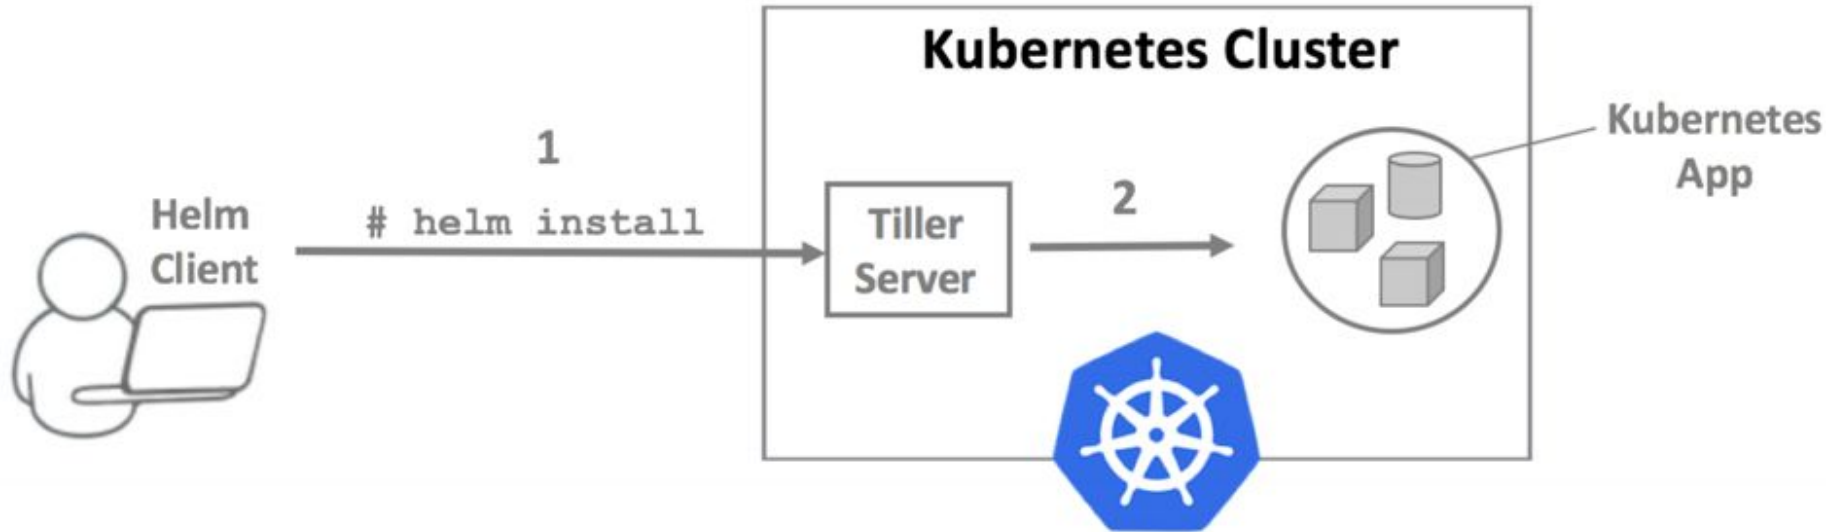

WHY HELM 3?

Helm 2

Helm 3

No Tiller

Simpler

Using Kubernetes API directly

Helm CLI Changes

helm delete	--->	helm uninstall
helm inspect	--->	helm show
helm fetch	--->	helm pull

helm2 delete	=	helm3 uninstall --keep history
helm2 delete --purge	=	helm3 uninstall

Library Charts

Common libraries
Not deployable

```
dependencies:  
  - name: mylib  
    version: 1.x.x  
    repository: quay.io
```

Chart Repo

Distribution Project = Docker Repository V2

Dependencies

Helm2

```
dependencies:  
- name: mariadb  
  version: 5.x.x  
  repository: https://kubernetes-charts.storage.googleapis.com/  
  condition: mariadb.enabled  
  tags:  
    - database
```

Helm3

```
dependencies:  
- name: mariadb  
  version: 5.x.x  
  repository: https://kubernetes-charts.storage.googleapis.com/  
  condition: mariadb.enabled  
  tags:  
    - database
```

Namespaces

```
helm2 install -n demo2 .
```

```
helm3 install demo3 .
```

Namespaces

```
helm2 install -n demo2 . --namespace yavor
```

```
helm3 install demo3 . -n yavor
```

Namespaces

```
helm2 install --name demo2 . --namespace yavor
```

```
helm3 install demo3 . --namespace yavor
```

Namespaces

```
helm2 install --name demo2 . --namespace yavor
```

```
kubectl get pods -n yavor
```

```
helm3 install demo3 . --namespace yavor
```
